

MILL CERTIFICATES

4.0 MILL CERTIFICATES

The **MILL CERTIFICATES** tab allows you to view the material certificates added in the web application. This feature works only in online mode.

To view the material certificates,

1. Tap **MILL CERTIFICATES**. See Fig 2.3.

The **Mill Certificates** page opens.

2. Tap the **Component** box and select the component name from a drop-down list.

Note: If you want to view the certificate for a specific component, enter the size, thickness, material name, class, heat number, rating, do number, expiry date or remarks of the component in the respective boxes.

3. Tap **Get Certificates**. A list of material certificates for the selected component is appeared.

Tip: If you want to view any attachment added with the material certificate, tap (Attach icon).

Note: If the number of certificates exceeds 500, you will receive the following notification: **“The result records are more than 500, so system can’t load, pls add another filter and search”**.
